

## Trilateral Seminar of the French, German and Polish Groups

By Laurence Loumes, Plasseraud IP, France

On April 21 and 22, the French, German and Polish groups were finally able to meet in person in Munich! The meeting took place in a framework of traditional trilateral IP seminars of the three groups. The two days of conferences on the “Latest Developments in French, German and Polish Intellectual Property Law and Practice” showcased the different practices with talks on trademarks, copyright, patents designs and trade secrets. A social event on the evening of the 21st allowed everyone to catch up. The beaming faces of the participants are a testimony of the pleasure they had meeting in person post covid.
