

SCAN THE GLOBE

Webinar Series

Scan the Globe Webinar Series

By Nazli Korkut Ozsoy, First Deputy Secretary General

Scan the Globe is planned as a series of webinars to be started as a part of the AIPPI 125th anniversary activities, which will begin in 2022 with at least two separate webinars and will last into 2023. The purpose is to give AIPPI members access to information about IP laws and practices around the world, especially regarding developments in lesser-known jurisdictions/regions, and share recent litigation cases to show the implementation of the law and where certain decisions made during IP prosecution can affect later enforcement activities. This series will also serve as a medium strengthen our internal relationship and engage with national associations within the region.

In this 1.5-hour webinar, a summary of IP systems in defined regions will be presented:

- Outline of IP systems and applicable treaties
- Recent statistics with the number of applications and registrations, percentages filed by domestic applicants, trends
- Selected topics like recent or expected changes in the IP systems, current problems or issues, notable events or cases, enforcement strategies

For the first edition of the webinar series on 2 June at 10 am CET, we will focus on the ASEAN region and are delighted to be collaborating with WIPO and South-East Asia IP SME Helpdesk.

For this session, we will welcome as speakers Peter Willimott, Officer-in-Charge at WIPO, Elio de Tullio, External Expert at South-East Asia IP SME Helpdesk, and Regina Quek, Second Deputy Secretary General at AIPPI.
